## ABOUT THE AUTHOR

A true believer in listening to one's passion, Patrick Greenwood began writing in early 2020 based on several trips he made while cycling in various countries. In this novel, Sunrise in Saigon, Patrick draws upon several non-fictional events in Vietnam, including the war with the US, the last days of Saigon falling, and the chaos at the US embassy. Having remembered these events as a young man, Patrick grew up wanting to travel to Vietnam someday and visit these places for himself.

## TARGET AUDIENCE

For Male or Female, ages 19 to 75, "Sunrise in Saigon" draws upon more than just a romance story between Jack and Linh. The story is a connection of the journey in life we have inside ourselves - knowing that every life decision has rewards and consequences.

Many people that have read this story often comment on how life should not be about regret. How often do we reflect on our decisions, only to regret our choices? People are afraid of "what if." Jack knew what was at stake, yet he decided, just like Linh, to meet on 12-12-2012.

## SUNRISE IN SAIGON

With echoes of Tom Clancy and Jack Higgins, "Sunrise in Saigon" is Patrick Greenwood's first book in a new series about cybersecurity, passion, and international espionage.

Intrigued by the country of Vietnam since 11, Jack Kendall long remembered the fall of Saigon in 1975 and its painful aftermath. Jack learns from eyewitnesses about the long shadow of the Vietnam war, its atrocities, and its aftermath. He knows a couple who met under the most extreme circumstances, one on the helicopters leaving Vietnam, the other stranded behind. The two swore to find each other again and did, decades later. That story resonates with Jack as he finished serving honorably in the United States Marine Corps and embarked on a career in cybersecurity technology.

Even with this career success, his life is not fulfilled. His health, both physical and emotional, deteriorates. He turns to cycle and returns to his fascination with Vietnam. His research leads him not only to that country but to a captivating woman.

While in Vietnam, he sees the beauty of the people and the land and its poverty, graft, and human trafficking. It is through his relationship with the country and his newfound love that his life is transformed.

“... Greenwood’s graphic presentations enabled me to experience Vietnam as though I were there myself. The sexual intimacies of Jack and Linh are equally vividly described, and the author’s prose is poetic and picturesque, yet it does not overwhelm the storyline. Rather, it enhances it by creating a rich tapestry of sensory experiences that enables me to enter Jack and Linh’s world.
